The action of the legislature in creating a fund of nearly a million dollars to be spent on Honolulu streets within the next two years, the present contracts to be carried out under the amended frontage tax, the perfection of the sewer, garbage and water systems of the city, all need an administration which will work in harmony in every department. The Republican candidates are pledged to work together if elected.

Any Democrat elected, no matter how good a man, would throw this system into confusion. He would be an opposition candidate and for political purposes make all the trouble he could. The Republicans have nominated a set of men who can be counted upon to keep their pledges. They represent every element of this community. The business man must remember that if he can cut the candidates who represent the laboring element or the 5th District, the 5th District voter and laboring man will also cut the candidates representing the business element and the result will be a confusion that is of benefit to no one. From a business standpoint, it would be the height of folly to cut one name on the Republican ticket.
